

XPLANATION ACQUIRES MATRIX, DIVERSIFIES BUSINESS AND REINFORCES PRESENCE ON LARGEST MARKET IN EUROPE.

LEUVEN (BELGIUM) and MUNICH (GERMANY), 12 December 2016 – Xplanation Language Services, a global provider of translation and localisation services, announces today it is joining forces with Matrix Communications. Working with many household brands for over a decade, Munich-based Matrix is a leading translation solutions provider on the German market.

“We believe joining forces with Xplanation will generate significant added-value for our customers over the coming years,” said Michael Vos, founder of Matrix. “While Matrix customers may expect the same high quality and service levels they are used to, our service offering will now move to the next level as they benefit from broader technology infrastructure and global set-up at Xplanation.”

Since its foundation in 2006, Matrix has built an outstanding reputation as a solution-driven partner for international corporations, a variety of leading brand names and public institutions.

Steven Van Lint, CEO at Xplanation, stated: “We spent a lot of time looking for the right fit as it was of the utmost importance to find a company sharing our same values of customer-centricity and technology excellence. With Matrix, we found a great match: loyal customers, talented staff, a reputation for reliability and service. Customers should feel it will be business as usual with an extra dimension.”

About MATRIX Communications

Established in 2006, Matrix is a specialized translation and localization provider. With a strong focus on high-quality, cost-efficient solutions, Matrix works closely with global corporations in various industries, leading brands and public institutions.
